

### **Emmilia Hodak, MD**

Emmilia Hodak is the professor of dermatology and the director of the Cutaneous Lymphoma Service at the Davidoff Cancer Center at Tel Aviv University in Tel Aviv, Israel.

Professor Hodak is actively involved in many international professional activities. She is the immediate past president of the International Society for Cutaneous Lymphomas, and a board member of the European Organisation for Research and Treatment of Cancer (EORTC) Cutaneous Lymphoma Tumor Group.

Professor Hodak and her multidisciplinary team are intensively engaged in clinical and translational research on cutaneous lymphomas. They have made major contributions, including defining various clinicopathological variants of mycosis fungoides (MF), characterizing pediatric MF, investigating familial MF, shedding light on the immunological and molecular mechanisms underlying the development and progression of MF, exploring new biomarkers, and investigating new drugs and therapeutic approaches.

Dr. Hodak earned her MD from Tel Aviv University and completed specialization training at the Department of Dermatology of Rabin Medical Center, affiliated with the Sackler Faculty of Medicine, Tel Aviv University. After earning board certification in dermatology, she was granted a 1-year fellowship in dermatopathology from New York University in New York, NY, USA, and served as a guest investigator for a year in the Laboratories for Investigative Dermatology at The Rockefeller University in New York, NY, USA. Upon returning to Israel, Dr. Hodak assumed a full-time position as a senior dermatologist in Rabin Medical Center.
