

**David E. Cohen, MD MPH**

David Cohen is the Charles C. and Dorothea E. Harris professor and vice chairman for clinical affairs for the Ronald O. Perelman Department of Dermatology of New York University School of Medicine and leads the section on occupational and environmental dermatology. He joined the NYU faculty in 1994, and his work has concentrated on inflammatory skin diseases, cutaneous allergic and toxic reactions to exogenous and photoreactive chemicals, and the interaction of environmental stressors on the skin.

Dr. Cohen is the past president of the American Dermatological Association and has served as president of the American Contact Dermatitis Society, the Dermatology Section of the New York Academy of Medicine, and the New York Dermatological Association. He has authored 113 articles and 22 book chapters and has lectured nationally and internationally on a variety of dermatologic disorders.

Dr. Cohen received his medical degree from the State University of New York at Stony Brook School of Medicine and his masters of public health from Columbia University. He served as an intern at Columbia Presbyterian Medical Center, a dermatology resident at New York University Medical Center, and a resident in occupational and environmental medicine at Columbia University School of Public Health.
